

HYBRID FACT SHEET

DE 14-002

Description: DE 14-002 is a new addition to Delta Seed's arsenal. DE 14-002 is a conventional hybrid. DE14-002 is a more single ear hybrid. The primary ear is large. In the Delta trials, DE14-002 performed very well, especially in the more eastern production regions. De 14-002 produces very consistent yields. Ear placement is low and a higher plant density is recommended. The hybrid produces very stable yields. It is an exceptionally well-balanced hybrid with excellent standing ability and it dries quickly.

General Characteristics

Days to Tassel (Approx)	58 - 76
Growth Class	Ultra Early
No-Till Adaption	Green
Emergence	Green
Seedling Vigour	Green
Drought Tolerance	Green
Irrigation Potential	Green
Acid Sat. Tolerance	White
Grain Potential	Good
Silage Potential	Avg

Plant Traits

Standability	Green
Plant Height	Medium to short
Leaf Angle	Semi-Folded
Cob Placement	Low
Prolificacy	Single Ear
Disease Risk:	
Common Rust	Red
Northern Corn Leaf Blight	Green
Grey Leaf Spot	White
Phaeosphaeria Leaf Spot	White
Diplodia Cob Rot	Yellow
Fungicide response	Medium

Recommended Plant Populations

Cool Eastern areas	30 000 - 45 000
Moderate Eastern Areas	45 000 - 65 000
Mist Belt	65 000 - 70 000
North-West Free Stat	28 000 - 38 000
North-West	-
North East Free Stat	35 000 - 45 000
Far West and Far Northern Areas	-
Irrigation	80 000 - 100 000

Ear Traits

Kernel Rows	16-18
Kernel Depth	Deep
Dry Down	Good
Husk Cover	Good

Key

Green	Good/low risk
Yellow	Average/moderate risk
Red	Poor/higher risk
